LIVEWELL TANK SEACOCK THRU HULL INTAKE FITTING FILL HOSE SEACOCK LIVEWELL PUMP LIVEWELL DRAIN DRAIN HOSE AFT COCKPIT ACCESS HATCH TRANSOM THRU HULL DRAIN 150 Montauk. Experiment to see how it performs. One method is to turn the rode around a bitt or a cleat and slowly pay out as the boat 150 Montauk. The battery is charged AVOID contact with skin, eyes and clothing. If by the engine when the engine is running. MAIN DC BREAKER. 30 AMP BILGE PUMP. 2 AMP 150 Montauk. The 150 Montauk has the option of using a battery switch. The switch, located on the aft wall of the Trolling Motor wiring Option console interior, allows you to control the delivery Fig. Cation Chart DO NOT use petroleum based products, such as petroleum jelly, on the zippers or fasteners. The above substances will attack the surface of the acrylic. 150 Montauk. Check with the trailer manufacturer for scheduled maintenance of your trailer. 150 Montauk. MAINTENANCE LOG ENGINE SERVICED DATE HOURS MAINTENANCE PERFORMED NOTES 150 Montauk 511. Engine and generator exhaust contains odorless and colorless carbon monoxide gas.

Signs of carbon monoxide poisoning include nausea, headache, dizziness, drowsiness, and lack of consciousness. In the mid50s, the inventor and founder of Dick Fisher drew attention to a newThe boat aroused great interest among buyers. It was lightweight inThis made it possible to install motors of lower power without loss in speed. In support of the latter, in 1961, the famous American magazine Life published photos of how Dick Fisher, being in the middle of theContrary to expectations, both halves remained afloat, and the inventor was even able to get to the shore using the stern with a motor. Boats were actively used in the Vietnam WarThe Super Sport andVantage Bowriders are more comfortable than previous series. We are trying to find out the gas tank size. Jimh usually pipes in to check your owners manual for an answer. The perverbial lightbulb usually goes off in my head saying why did I not think about that. After owning 22 Whalers and God knows how many other makes and stray outboards to boot. I think I have actually received 2 or 3 owners manuals with my purchase. So with this information in my poll, how many USED boat buyers here actually received an owners manual either for their boat, engine, or both. I am not talking service manuals, I am referring to the 30 or so page pamphlet that you get when you buy it new that states 2000 Suzuki 70hp owners Manual on it and made by the company who made the product. This is for USED buyers ONLY. I and everyone else usually get an owners manual when you buy new. Im guestimating about about 50 percent of the time. The 150 HP MERCURY Black Max outboard did NOT come with an owners manual, however, it DID come with a factory service manual, which I found quite helpful. It also had some greasy pages, where the previous owner had consulted it previously. The owners manual for your boat classic Whalers are generally available here on this site. No manual for the boat. Even when purchasing a used motor from a dealer.

I just purchase a 25 hp Yamaha and have all the paper work for it as well. Good info so far. Close to a deal breaker. I bought a new from the dealer Montauk in 1986 and cannot say for sure that I passed the book work on to the next lucky fellow. Must be the loose Florida life style. Thankfully they are always unlocked. I let one of them go with a sale, but had to hang on to one as a keepsake. By the way, I tested the prop you sent me on Thanksgiving day and it works well with the 60 Evinrude on my 15 classic. Thanks again, Keith None have come with engine manuals. Each of the boats I have purchased have been in excellent shape and the materials handed to me upon purchase proved the loving way each boat was treated. PS I am doing my best to continue the tradition, I still have 3 of the boats. John L. Only 2 of those 4 that had owners manuals for the hull also had the manuals for the motor as well. That said my when I bought my 1976 Newport with its 1974 Evinrude Starflite 85hp motor in December of 2007 the vessel came with a complete owners manual, original wood location drawings and packing list from Whaler. Also, the motor had its original owners manual, bill of sale from its purchase, warranty documents, warranty registration card looks like an Evinrude Credit Card, dealer checklist and a complete hand written diary of the entire motors use and service history. I still use the diary to log service and hours on the motor. I added up the hours last year and though I did not remember the exact number it was well under 250. Though all these documents really do not add to the value. they are still neat to have. BTW NONE of the Whalers where ever missing a key for the consoles or other lockers, motors or trailer. The only documentation it did not come with was the service manual for the engine, and the purchase date of the Group 24 Marine Battery. But it did have the engine manual for the 2000 Mercury.

My 1979 Montauk came with nothing except for the photocopied Mills canvas installation diagrams. My 1989 Outrage 22 Cuddy came with the original Whaler owners manual, the vinyl pouch well worn, the original Mercury owners manual for the 200 and one for the 15. Also included were factory shop manuals for the 200 and for the 15. In addition, there was a manual for the Loran, one for the CRT depth sounder and one for the vintage color Garmin GPS. Missing was the owners manual for the VHF radio, but I was able to download a copy from the internet. The one for the 120 Evinrudes is the factory manual and takes a 3 inch binder to hold it. Jeff If anyone needs or wants copies please email. Mel They were all passed on to the guy who bought it from me. My 2004 13 Sport came with nothing. The 1976 boat and motor came without owners manuals. The 1987 boat came with outboard owners manuals, but not a Boston Whaler boat manual that I can recall. The 1990 boat came with owners manuals for the boat and 1992 motor. In regard to outboard motor owners manuals, they generally contain a great deal of very interesting information specific to a particular motor and can answer many common questions about how to operate the motor. The Owner's Manual Packet has been compiled to help you operate your boat with safety and pleasure. It contains details of the boat, the equipment supplied or fitted, it's systems and information on it's operation and maintenance. Please familiarize yourself with the boat and it's operation before using it. If this is your first boat, or you are changing to a type of boat you are not familiar with, for your own comfort and safety, please ensure that you obtain handling and operating experience before "assuming command" of your boat. Boston Whaler is not responsible for changes to parts or accessories manufactured by companies other than Boston Whaler.
